EDUCATION

2019 - present	Massachusetts Institute of Technology S.M. in Electrical Engineering and Computer Science S.M. in Computational Science and Engineering	GPA: 5.0/5.0
2013 - 2017	King Saud University B.Sc. in Computer Science <i>First Class Honors</i>	GPA: 5.0/5.0

EXPERIENCE

Sep 2019 - present	Research Assistant, MIT Cambridge, MA, USA.
Jun 2021 - Aug 2021	Software Engineer Intern, DataCebo <i>Worked on synthetic data generation using deep learning, with a primary focus on generating time series data.</i> Cambridge, MA, USA.
Dec 2017 - Aug 2019	Research Specialist, Center for Complex Systems at KACST and MIT Riyadh, Saudi Arabia.
May 2017 - Dec 2017	Data Analyst, Mozn <i>Developed solutions for challenging problems on a national scale, including: policy auditing, fraud detection, and optical character recognition using machine learning.</i> Riyadh, Saudi Arabia.
Sep 2016 - Feb 2017	Junior Teaching Assistant, King Saud University <i>Courses: Programming I using Java</i> Riyadh, Saudi Arabia.

HONORS & AWARDS

- Graduate Scholarship, King Abdulaziz City for Science and Technology (KACST), 2019 - 2026.
- Google's CS Research Mentorship Program (CSRMP), 2020 - 2021.
- Graduate Fellow, MiSK, 2019 - 2022.
- 2nd place at AEC annual best graduation project, 2017.
- Best graduation project in the college of Computer and Information Sciences, King Saud University, 2017.
- Best poster at the 9th Undergraduate Research Conference, Zayed University, 2017.
- Dean's list for outstanding students at King Saud University, 2015 and 2016.

RESEARCH PROJECTS

Time Series Anomaly detection

Sep 2019 - present

Supervised by Kalyan Veeramachaneni

MIT

- Developed *Orion*, a system for end-to-end time series anomaly detection.
- Designed algorithms for time-based anomaly scoring.
- Created a benchmark suite for comprehensive quality and computational evaluations.
- Built a generative adversarial network for reconstruction-based anomaly detection.

Cardea

Sep 2018 - Aug 2019

Supervised by Kalyan Veeramachaneni

Center for Complex Systems

- Developed *Cardea*, an automated machine learning library to solve health related prediction problems.
- Integrated HL7's *Fast Healthcare Interoperability Resources* standard as a representation for data.
- Automated the data ingestion, organization, and featurization components of the framework.

Job Space

Dec 2017 - May 2019

Supervised by Ahmad Alabdulkareem and Iyad Rahwan

Center for Complex Systems

- Constructed an occupation network by discovering job-job relationships through their underlying skills.
- Utilized the job space as a function to predict individual career trajectories.
- Analyzed the impact of automation on job mobility and the education hierarchy.

CLASS PROJECTS

Gender Bias in Language Models

Spring 2021

6.864 Natural Language Processing

- Identified model components (neurons, self-attention heads) that contribute to biased output.
- Proposed mitigation strategies to reduce the discrimination severity of the model output.

Intuitive Physics for Game Play Bots

Fall 2019

9.660 Computational Cognitive Science

- Built a probabilistic program to infer actions performed by an agent in a Newtonian setting.
- Complemented the program with a model-free approach to sample more efficiently.

PRESENTATIONS & WORKSHOPS

Network Science for Data Analysis Workshop

27th Feb, 2019

Women in Data Science (WIDS), Riyadh, Saudi Arabia.

Cadea Platform for Smart Health Analytics

30th Nov, 2018

MIT Hacking Medicine, Riyadh, Saudi Arabia.

S³: Saudi Skill Space

14th Nov, 2018

Misk Global Forum, Riyadh, Saudi Arabia.

Deep Learning for Image Recognition Workshop

5th Mar, 2018

Women in Data Science (WIDS), Riyadh, Saudi Arabia.

SKILLS

	Applied Machine Learning, Data Science, Software Engineering
Programming	Python, Julia, R, C, C++, MATLAB, Java, JavaScript, HTML, SQL
Languages	English (native), Arabic (native)
